

FIBER International Symposium

FIBER FORUM 2011

November 6th (Sun) ~ 8th (Tue), 2011

Port Island Campus of Konan University, Kobe, Japan

Organized by Frontier Institute for Biomolecular Engineering Research(FIBER), Konan University

Co-sponsored by the
Chemical Society of Japan

International Year of
CHEMISTRY
2011

Symposium Chair

• Naoki Sugimoto

Director of FIBER
Professor, Konan University

• Janez Plavec

Professor, head of Slovenian NMR Center
National Institute of Chemistry, Slovenia

NMR studies of cations interactions with G-quadruplexes

• Jean-Louis Mergny

Professor, Institut Européen de Chimie et Biologie,
Université Bordeaux, France

Quadruplexes are everywhere

• Jean-Marc Escudier

Professor, Laboratoire de Synthèse et Physico-Chimie
de Molécules d'Intérêt Biologique, Université Paul
Sabatier, France

Structure and functionalization of oligonucleotides by means of 5'C-substituted nucleosides

• John Randolph

Glen Research Corporation, USA

Some interesting and practical aspects of nucleic acid synthesis

• Katsuaki Kobayashi

Assistant Professor, Institute for Molecular Science,
Japan

Fabrication of DNA nanowire by using laser pulling effect

(alphabetical order)

• Tamaki Endoh

• Satoru Nagatoishi

• Hisae Tateishi-Karimata

Location

Symposium Secretariat
